TITLE: LAWN SPRINKLER NOZZLE PROVIDED WITH MEANS TO ADJUST SPRAY

ANGLE THEREOF

PRELIMINARY AMENDMENT

Commissioner for Patents P. O. Box 1450 Alexandria, VA 22313-1450 Sir:

In conjunction with the filing of the present application, and prior to an initial Official Action on this matter, please amend the above-identified application as follows:

Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraph [0002], please amend the paragraph as follows:

The conventional lawn sprinkler nozzle is generally provided with a structure enabling the nozzle to spray in various patterns at a fixed angle. Such <u>a</u> conventional lawn sprinkler nozzle as described above is therefore limited in function in that <u>because</u> it is incapable of cost-effective irrigation in terms of water consumption.

In Paragraph [0007], please amend the paragraph as follows:

FIG. 2 shows an exploded <u>perspective</u> view of the preferred embodiment of the present invention.

In Paragraph [0008], please amend the paragraph as follows:

FIG. 3 shows a longitudinal sectional view of the preferred embodiment of the present invention in combination.

IN THE ABSTRACT

On page 9, please amend the Abstract as follows:

A lawn sprinkler comprises includes a connection pipe, and a spray angle adjustment structure mounted at one end of the connection pipe and formed of a circular distribution member, an adjustment member and a control member. The control member is actuated to turn by the adjustment member such that one or more of a series of arcuate rims of the control member block one or more of a series of arcuate through holes of the circular distribution member, thereby resulting in the sprinkling of water in various patterns.
